

The Kelly Smoother is the ultimate levelling tool

It smooths and levels plowed down levees and will work in wet or dry conditions.

This innovative tool uses the proven technology from our Kelly Tillage System and focuses on the problems of levee banks, roadways, small fields, gravel lots and equestrian trackies. Your needs and imagination is the only limit.

The 12' cutting width is ideal for 60 -80hp tractors.

The full range of Kelly Disc Chains and Prickle Chain can be fitted to the smoother. The discs are made from a variety of abrasion resistant metals, they are designed to last and last. The concave shape adds strength to the discs and enhances their cutting and digging abilities. We now offer prickly chains and a range of disc chain types to suit specific soil types and conditions.
